

I subscribe to XM radio. I greatly appreciate the variety of music and entertainment that is available through this venue which I have not found on either AM or FM radio. I would like the service that I have purchased to offer as broad a range of programming as possible, both national and local. I did not abandon my local stations when I started listening to satellite. I still listen to both AM and FM radio and contribute to my local public radio stations.

We should encourage free competition and not let special interest lobbyists dictate what I can hear on my satellite stations.
